CROWNWeb Facility-Level Reports

Facility-Level Reports	
Report	Definition
Facility Reports	
Facility Personnel Report	Allows users to run and print a report that includes facility details including location, status, shifts, and services. It also provides a detailed list of all personnel associated with the selected facility including full name, position, UPIN, email, and contact information for selected in-scope facilities.
Patient Report	
Patient Roster Report	Allows users to run and print a report that includes all patients present at the selected facility(ies) within the user scope as of a specific date or date range.
Audit Reports	
Audit Forms Report	Allows users to run and print a report for 2728, 2746, or both form types submitted by specified facilities within an entered date range.
Audit Additions Report	Allows users to run and print a report by module(s) to show any newly submitted records within the selected module(s) by specified facilities within an entered date range.
Audit Deletions Report	Allows users to run and print a report by module(s) to show any deleted records within the selected module(s) by specified facilities within an entered date range.
Audit Updates Report	Allows users to run and print a report by module(s) to show any updated records within the selected module(s) by specified facilities within an entered date range.
Clinical Performance Measures (CPMs) Reports	
ESRD CPM Hemodialysis Summary Report	Allows users to run, view, and print a report for a specified reporting period end month and year. The reporting period for this report is three

CROWNWeb Data Management Guidelines

	months. The report provides percentages of patients meeting each measure and number of patients considered for each measure at the Facility, State, Network, and National levels.
ESRD CPM Peritoneal Dialysis Summary Report	Allows users to run, view, and print a report for a specified reporting period end month and year. The reporting period for this report is six months. The report provides percentage of patients meeting each measure and number of patients considered for each measure at the Facility, State, Network, and National levels.
Quality Improvement Reports	
ESRD Fistula First Summary Report	Allows users to run, view, and print a report for a specified reporting period end month and year. The reporting period for this report is one month. The report provides number of patients considered for the measures or percentage of patients meeting the measures at the Facility, Network, and National levels.
Vascular Access Reports	
Vascular Accesses in Use Report	Displays the count and percentage of each type of vascular access used at a selected facility for a user-defined date range. The user has the ability to select various report layouts to compare data by either Month or Facility/State/Network/Nation. In addition, the report provides the user with the ability to view patient information for patients included in the facility level counts. Note: This report also includes a graph displaying a high-level summary of the data.
Fistula Rates Comparison Report	Displays the count and percentage of AV fistulas (2 needles) used at a specific facility for a user-defined date range. In addition, the report includes State, Network, and National data for comparison. Note: This report includes a graph displaying a high-level summary of the data.
Vascular Accesses Maturing Report	Displays the count and percentage of AV fistulas maturing and patients with AV grafts maturing at a specific facility for a user-defined date range. The user has the ability to select various report layouts to compare data by either Month or

CROWNWeb Data Management Guidelines

	Facility/State/Network/Nation. In addition, the report provides the user with the ability to view patient information for patients included in the facility-level counts.
Vascular Assessment Prior to Initiation of Dialysis Report	Displays initial patient data that was used to populate the CMS-2728 form for patients at a specific facility during a user-defined date range. The user has the ability to select various report layouts to compare data by either Month or Facility/State/Network/Nation. In addition, the report provides the user with the ability to view patient information for patients included in the facility-level counts. Note: Patients with an initial 2728 form prior to March 1995 will not be included in the report.
Access Data Missing In CROWNWeb Report	Displays a list of all patients admitted to the selected facility who do not have vascular access data entered into CROWNWeb.
Notification and Accretions Reports	
Open Accretions Report	Lists discrepancies supplied by REMIS that need to be researched. The report shows all open Accretions for a specific facility.
Open Notifications Report	Lists discrepancies supplied by REMIS that need to be reconciled to the data in CROWNWeb. The report shows all open Notifications for a specific facility.
Accretion Data History Report	Shows the original data from the Accretion.
Notification Data History Report	Shows the original data from the Notification.
