

# How to Print Out the Peer Mentoring Modules and Test Questions

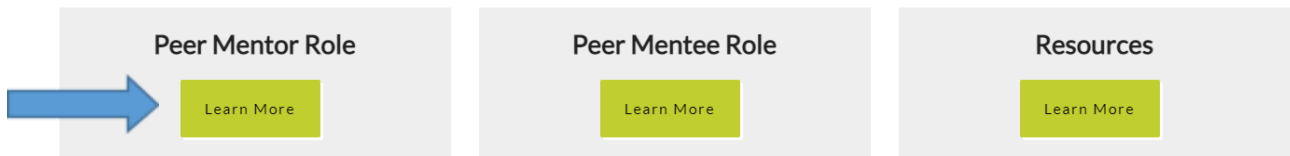

**Step One:** Go to <https://www.kidneylearninghub.com/> to login or register to create an account. Note: the patient must be the one to create the account so they get credit for completing the modules.

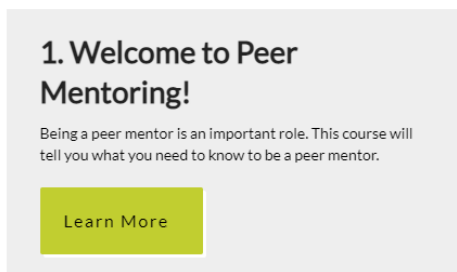

Once you are in, click on the View Courses icon

**Step Two:** Select the **Peer Mentor Role** to gain access to the modules. There are also modules for Peer Mentees and additional resources.

**Step Three:** The patient has to complete the modules in order. Click on the module patient is going to complete.

**Step Four:** Select the blue box on the left hand side **Start Course**

There will be two options for how you review the module. There is an audio guidebook option if that is what the patient would prefer. To print the module, select just the guidebook. It will populate the PDF version which can be printed. If you would like to also print the quiz beforehand so the patient can answer the questions as an open book test.

## End Stage Renal Disease Overview

This course contains:

- Guidebook—the course learning lesson
- Audio version of the Guidebook
- Quiz

To read the course, click on the Guidebook to open it. You can save the document to your device or read the document on your device.

To listen to the course, click on the Audio Guidebook to open it. Make sure your device speaker volume is turned on.

**When you are ready, take the quiz.**

**Step Five:** In the upper right hand corner, select the printer icon. From here you can print out the quiz for the patient to take manually. After completion, you may enter in the patient’s test results on their behalf by logging in to their Kidney Hub account.

# Quiz:
